CORBA - Implementazione ***Login and operations of the CORBA VM***

Luca Foschini

Anno accademico 2016/2017

CORBA Implementazione 1

Login info

- Host: 137.204.57.245, ssh port 10100
- User: corbauser Pwd: corbapasswordDisiUnibo
- Access through **ssh**:
`ssh -p 10100 corbauser@137.204.57.245`
- and type the password 😊

CORBA Implementazione 2

CORBA VM filesystem

- In your home you find:
 - **CORBA_Examples** directory where you can find CORBA code examples
 - **jacorb-3.8** directory where you can find JacORB
 - **_nsdb_root** file containing the naming service internal state

CORBA Implementazione 3

How to run your own example

- Copy the CORBA_Example for your own usage:
 - **cp -r CORBA_Examples matricola_surname_CORBA_Examples**
 - Your workspace, from now on is:
\$HOME/matricola_surname_CORBA_Examples

CORBA Implementazione 4

And now let's follow the existing labs (in italian)
